

Hello, Falcon Field Airport Tenants and Users,

On March 23, 2026, the Mesa City Council unanimously approved new and modified fees and charges for Falcon Field Airport as shown on the following links:

Exhibit A link: [639082151924600000](#)

Exhibit B link: [639064881215770000](#)

The effective date of the new and modified fees and charges is May 1, 2026, however the implementation date of the landing fees may be delayed as explained below and as set forth in the Resolution approved by City Council. Existing fees that were not adjusted and not included on Exhibits A and B will remain the same.

This action taken by the City Council supports the continued maintenance, operation, improvement, and long-term sustainability of the airport.

To implement the new landing fees, the City will go through a procurement process to contract with a third-party to track aircraft landings at the airport. If the third-party vendor is not in place and prepared to track aircraft takeoffs and landings on May, 1 2026, the Airport Director may delay the implementation date of the landing fees to a date when the third-party flight tracking system is in place, not to exceed 90 days. If the Airport Director delays the implementation of the landing fees, the Airport Director will provide written notice of the delay and the date the landing fees will be implemented. A notice will also be posted on the Falcon Field Airport website: [Falcon Field Airport | Home](#).

To ensure a smooth transition and provide clear guidance to all airport users and tenants, additional information regarding landing fee billing and payment options will be shared once the third-party vendor is selected and the implementation process commences.

If you have questions about the landing fees or the modified fees and charges for Falcon Field Airport, please contact the Airport Administration Office at [airport.info@mesaaz.gov](mailto:airport.info@mesaaz.gov) or (480) 644-2450.
